

Everybody Prepared and Inspired to be the Best we can be.
Excellent Relationships.
Excellent Classrooms.
Hearts in Billingham and Eyes on the World.

Design and Technology Vision Statement

At Billingham South Community Primary school our vision is for children to use their own creativity to design and create products which aim to solve both real and relevant problems. We want the children to be problem solvers who are not afraid of making mistakes. Children will foster mutual respect when listening to others and sharing ideas. Design and Technology is an inspiring, rigorous and practical subject. It is taught through cross curricular planning and children will be required to use their former knowledge of other subjects such as mathematics, science, computing and art.

Design and Technology lessons will provide opportunities for children to develop Design and Technological skills, knowledge and understanding to meet the requirements of the National Curriculum. Pupils will be involved in designing, developing and making their own products. Design and Technology encourages children to examine their environment, question the world and to think about how and why things work the way they do. We want the children to become critical thinkers. They will evaluate their own work and will also evaluate familiar products. They will learn how to manage and control risks, work safely with a variety of tools and materials, become resourceful, innovative and enterprising individuals.

Nutrition

We have a fully equipped food technology room where practical lessons take place. The children will find out how to apply the principles of nutrition and healthy eating. The children are taught how to prepare and cook food. We aim to instil a love of cooking and to enjoy creating healthy and nutritious food.
