

# Dinosaur Planet

Session	National Curriculum objective Children are to learn about:	Activity.
1	Find and name continents on a world map	Locate continents on a map
2	Find and name oceans on a world map	Located oceans on a map
3	I can share my ideas with others	Endangered animal poster
4	To make careful observations to identify similarities/differences in dinosaurs.	Archie Wood – dino similarities and differences
5	To explore observations and comparisons and present results in a carroll diagram	Carroll diagram – sorting dinosaurs
6	Know the continents and begin to understand time period	Fact cards - Triassic, Jurassic, Cretaceous period
7	Know the continents and begin to understand changes over time	Fossil sorting
8	What were the conditions like?	Look at a Jurassic forest features
9	What did dinosaurs eat? Predict, investigate and make a fair test. Use drawings to communicate information. Making observations and taking measurements.	Archie Wood – herbivore/carnivore – teeth!
10	that simple levers and sliding mechanisms can be used to create movement that levers are used in products eg scissors, balances and moving books	Dinosaur book
11	to make simple sliding and lever mechanisms to suggest ideas and explain what they are going to do to use drawings to represent products	As above
12	to model their ideas in card and paper to make their design using appropriate techniques	As above
13	to evaluate their product by discussing how well it works in relation to the purpose	As above
14	To learn about a significant person from history.	Mary Anning
