

Everybody Prepared and Inspired to be the Best we can be.  
Excellent Relationships.  
Excellent Classrooms.  
Hearts in Billingham and Eyes on the World.

### Maths Vision Statement

At Billingham South Community Primary School we teach Maths in order for our pupils to make sense of the world around them through developing their ability to calculate, reason and solve problems. Our Maths Curriculum enables them to understand and appreciate relationships and patterns in both Number and Space in their everyday lives.

We seek to give opportunities to develop and reinforce our core values:

We wish to promote:

- Positive, resilient attitudes and pupils who are happy and confident to take risks with their learning.
- A desire for our pupils to work hard to achieve their best and to understand that their ability is not fixed.
- A desire for our pupils to help and support each other when appropriate.
- The ability to make links with other subjects.

Our pupils will all receive a daily challenging maths lesson in which they are actively engaged in their maths work through practical/ investigative tasks, high quality discussions and interactions and activities to reinforce concepts. In addition, we recognise the importance of being able to calculate quickly and accurately and having a quick recall of basic mathematical facts.

Above all else, we want all of our pupils to have a love of 'Maths' and secure foundations on which to build.
